PRODRIVE™

AUTOMATED HOSE TRACTOR

The ProDrive is a hose feed device engineered to quickly and safely clean a broad range of pipes with or without a flange. The system is lightweight and designed for easy portability making it the perfect tool for limited access applications.

FEATURES:

- Less than 30 lbs (13.6 kg) – ideal for limited access applications
- Interchangeable gears allow use of a wide range of hoses
- Adjustable feed rates for optimal dwell time
- Built in backout preventer and splash guard for operator safety
- Navigates multiple welded 90° elbows without hose rotation

SPECIFICATIONS

MAX FEED RATE	2.5 ft/sec (762 mm/sec)
MIN FEED RATE	0.2 ft/sec (61 mm/sec)
POLY HOSES	4/2–8/4, 3/8 Rubber Covered
DRIVE WEIGHT	< 30 lbs (13.6 kg)

CONTROL BOX OPTIONS

Tripod Stand offers stability and the Floor Stand is lighter for easy portability. Both have a removable control box with 15 ft. (4.5 m) umbilical – maximizing mobility and providing excellent control in a compact size.
