BOILER TUBE CLEANING SYSTEM

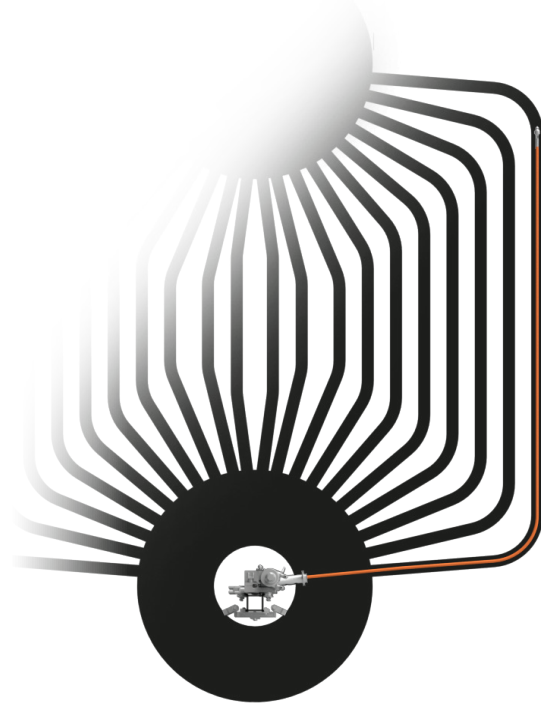

The StoneAge BTC-100 Boiler Tube Cleaning cleans radial tubes found in the mud drums of package boilers. It fits through a standard mud drum manway and cleans boiler tubes without the need for an operator to enter the vessel. Helix Drive Technology delivers up to 50 lbs (23 kg) of push to clear plugged tubes and travel long distances through multiple bends.

UPGRADES:

- Now comes standard with a water/impact resistant camera system to help simplify tube indexing
- Now comes standard with a durable, lightweight hose containment drum for safe management and storage of high pressure hose

SPECIFICATIONS

MAX PRESSURE	20k psi (1400 bar)
FLOW RANGE	5–30 gpm (19–114 l/min)
HOSE OD	0.6–1.3 in. (15–33 mm)
MAX HOSE LENGTH	75 ft (22 m)
WEIGHT	90 lbs (41 kg)

PRECISE, CONTROLLED HOSE FEED
Allows cleaning through multiple tube bends while protecting hose from damage.
