

Banshee® ProTex™ Splash Guard

Flex-Lancing Guard Designed for Banshee® Tube Cleaning Nozzles

Stainless steel construction throughout.

Anti-withdrawal collet secures hose.

For use with all **Banshee™** nozzles.

The **Banshee® ProTex™** is a lightweight, durable splashguard designed to keep operators of hand-held flexible hoses safe from the potential hazards of using high pressure water jets. The **ProTex®** can be used with the entire range of **Banshee®** rotary nozzles and the unique anti-withdrawal collet easily adjusts to fit many hose sizes. **StoneAge®** offers an optional 3 ft long tube for use with a stinger.

Protects the hose sheath as well as the operator.

Banshee® ProTex™

Banshee® Nozzles

The Splash Guard adapts to all Banshee® Nozzles.

Anti-withdrawal Collet

Adapts to various hose sizes with fingertip ease. Two set screws lock collet in position to prevent nozzle backout.

Upper Tube

Available in standard 1 ft. length for flexible lancing, or optional 3 ft. length for use with a stinger.

Guide Tube

Accepts either length upper tube with or without small-tool centering device.

Small-tool Centering Device

Optional collet for **BN9.5™**, **BN13™** and **BN18™** models. (Not necessary for **BN24™** and larger.)

Foot Box
with integral baffle.
